

# Guardian Telecom > Analog Telephones > SCT Series

Guardian's SCT Series of Steel Compact Telephones are engineered to deliver reliable, high quality communications in moderately harsh environments, where standard telephones are not suitable.

SCT models are designed for use in industrial applications and ideal for noisy areas.

## Advantages from Guardian

- ✓ Rugged design and construction for ultimate longevity
- ✓ 4 models for choice of keypads & handset cords
- ✓ Very compact footprint allows ease of placement
- ✓ Encapsulated circuitry impervious to dust, water and corrosion
- ✓ Magnetic hook switch for increased reliability
- ✓ DTMF or Pulse Dialing for universal application
- ✓ Noise reducing microphone with (optional) noise canceling version for enhanced clarity
- ✓ Equipped with receiver volume control for better intelligibility
- ✓ Surge arrestor for circuit protection
- ✓ Optional stainless steel mounting plate allows easier mounting
- ✓ Optional conduit hub for wiring method compatibility
- ✓ Optional handset retainer clips for high motion areas
- ✓ Housing color choices (special order)
- ✓ Temperature range -76°F to +176°F (-60°C to +80°C)  
– SCT-20 is rated from -40°F to +60°F (-40°C to +60°C)

## Industry Applications

Refineries, sewage plants, power generation facilities, drilling rigs, pulp and paper mills, hydroelectric facilities, food processing plants, warehouses, chemical plants, mines, construction sites, greenhouses, cement plants and more ...
